

CS 123 – Doubling Edge Weights

deadline: Tuesday, December 3 at 11:59 pm

Description of your assignment

Submission Format

On Gradescope submit `submission.py` (the name must match exactly) containing your solution. It will be called as follows:

```
python3 submission.py input_file output_file
```

1 Implementing the Double Edge Weights Algorithm

In this exercise you will implement *doubleEdgeWeights()* function.

Input

For both parts of the assignment, the input is a text file with the following format:

We have uploaded files corresponding to the visible test cases on Gradescope. They may help you test and debug locally. Passing these test cases does not guarantee your code is correct!
